

PRESENTATIONS OF PhD STUDENTS 27. 6. 2024, UKB B11-206

APPLICANTS AND STUDENTS ADMITTED TO THE 1st YEAR

8:30 Opening and organizational information

1.	8:40	Štěpánka	Pustková	499933	BOTA	prof. Milan Chytrý	Changes in the diversity of forest vegetation in southeastern Europe
2.	8:55	Dominik	Pliska	499022	HYBI	dr. Jindřiška Bojková	Spatio-temporal dynamics of zooplankton: the effect of local factors and historical continuity
3.	9:10	Kristýna	Kuklová	499936	PARA	dr. Barbora Pařčo	Parasites evolutionary trajectory using ancient environmental DNA
4.	9:25	Lenka	Baranovičová	500096	ZOOL	prof. Stanislav Pekár	Ecology and evolution of myrmecomorphic arthropods
5.	9:40	Elizaveta	Kvinikadze	490366	ZOOL	dr. Igor Malenovský	Patterns and mechanisms of vibrational signalling in psyllids (Hemiptera: Psylloidea)
Break 15 min.							
6.	10:10	Daniel	Dusík	499797	EKOL	doc. Jiří Schlaghamerský	Effects of habitat disturbance and stress on assemblages of soil-dwelling microannelids
7.	10:25	Jiang	Ming		EKOL	prof. Martin Reichard	Phylogenetic comparative analysis of fish life history traits
8.	10:40	Júlia	Buchtová	484525	EKOL	dr. Marie K. Adámková	Birds as indicators of wetland status: the response of birds to implemented revitalizations
9.	10:55	Veronika	Chalupová	484797	ZOOL	dr. Adam Konečný	Zoogeographic regionalization of sub-Saharan Africa based on diversity and phylogeny of crocidurine shrews (Eulipotyphla: Soricidae)
10.	11:10	Sophio	Maglakelidze	551149	ZOOL	doc. Jan Zukal	Cave-dwelling bats in Georgia – phenology and ecology of cave occupation

Committee discussion and decision announcement (60 min.)

Lunch break 65 min.

1ST YEAR STUDENTS

1.	13:30	Petr	Hubatka	460527	BOTA	prof. Milan Chytrý	Diversity of thermophilous oak forests in southeastern Europe
2.	13:45	Martin	Franc	437048	BOTA	doc. Jakub Těšitel	Functional plant ecology: from population to community - Soil properties as drivers of plant functional diversity
3.	14:00	Karolína	Slachová	473661	BOTA	prof. Michal Hájek	Vegetation of species-rich grasslands of the forest-steppe and submediterranean areas of Europe and its determinants
4.	14:15	Kristina	Svobodová	470305	EKOL	prof. Michal Horsák	Gastropod diversity of Central European forests in modern and historical perspective
Break 15 min.							
5.	14:45	Lukas	Koch	542758	EKOL	prof. Martin Reichard	Evolutionary ecology of reproductive parasitism in the <i>Synodontis multipunctatus</i>
6.	15:00	Janis	Czurda	544124	ZOOL	dr. Václav Gvoždík	Phylogeography, evolutionary history and taxonomy of frogs from the Congolian forests
7.	15:15	Laura	Brosseau-Acquaviva	544250	ZOOL	prof. Josef Bryja	Delimitation of Sudanian savanna phyloregions and description of geographical patterns of this phylogenetic structure using rodents as a model group
8.	15:30	Michal	Prikryl	553093	PARA	Assoc. Prof. Ivona Foitová	What orangutans can teach us: plants used for self-medication as a potential source of bioactive substances with amoebicidal and anti-giardial effects

Only the members of the admissions committee and the specialization boards, the heads of the department working groups and the supervisors of the presenting applicants/students may take part in the vote.
